EDUCATION

- 2017-2019
II HIGH SCHOOL - BYDGOSZCZ
- secondary education
- 2021 - 2025 (completed)
ADAM MICKIEWICZ UNIVERSITY
IN POZNAŃ
- Computer Science - Engineering Studies

SKILLS

- HTML
- CSS/SCSS
- JavaScript
- Python/C/Java
- React
- TypeScript
- Next.js
- Symfony
- Twig

LANGUAGES

- English (B2.2)
- Polish (native)

JAKUB CHMIELECKI

ABOUT ME

I am a Computer Science engineering graduate from Adam Mickiewicz University in Poznań. From the beginning of my education, I have actively developed my programming skills, with a particular focus on frontend development. During my studies, I also explored cybersecurity-related subjects, which sparked a deep interest in the field. Topics such as computer network security, cryptography, and data protection are areas I continue to explore independently through online courses, industry reading, and analysis of real-world attack cases. As part of my engineering project, I co-developed a CRM web application for hearing aid clinics. The project was built using Next.js, TypeScript, Tailwind CSS, and Firebase. It is available at sluchapp.com, although full functionality requires account confirmation by administrators. We are currently planning a commercial launch. Outside of programming, I am passionate about strength training and sports, which help me cultivate discipline, perseverance, and commitment—qualities I also bring to my professional work.

EXPERIENCE

- Engineering Project** 2024 - ongoing
 - As part of an engineering project, I co-developed the commercial system Sluchapp – a dedicated CRM solution for hearing aid clinics (www.sluchapp.com/landing). JULY - SEPTEMBER 2024
- Frontend Development Internship - Logonet (Bydgoszcz)**
 - During my three-month internship at Logonet, I acquired valuable hands-on experience in collaborative software development. I became proficient in working with the Symfony framework and technologies such as Twig, PHP, and SCSS, while also significantly enhancing my JavaScript skills.
- Mentorship Collaboration - Personal Projects** July - September 2023
 - As part of my collaboration with a mentor, I developed several front-end projects, including five that are available on my GitHub profile.
- Game Development Course (Python)** 2022
 - During the course, I developed two games, one of them is available on my GitHub.
- Various Front-End Projects** 2020 - 2023
- Medical Receptionist (Bydgoszcz)** 2020

STRENGTHS

- | | |
|---------------|--------------|
| Team-Oriented | Fast Learner |
| Punctual | Hardworking |
| Ambitious | Proactive |
